The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested.

Performance details provided are in share class currency, include the reinvested dividends gross of tax and are net of management fees. Sales charges, taxes and other locally applied costs have not been deducted. The fund's returns may increase or decrease as a result of changes to foreign exchange rates.

Up to date performance figures can be found on our website.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Performance is calculated as a lump-sum and is quoted in USD or in the base currency of the fund and its respective share classes currencies. Performance is calculated for the portfolio, individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised performance is the fund's total return expressed as an annual equivalent percentage rate over the time period listed. Currency fluctuations may affect the value of overseas investments. When investing in a fund denominated in a foreign currency, your performance may also be affected by currency fluctuations. In emerging markets, the risks can be greater than in developed markets. Investments in derivative instruments entail specific risks that may increase the risk profile of the fund.

This share class will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so.

The Effective Annual Cost (EAC) is a measure which has been introduced to allow you to compare the charges you incur and their impact on investment returns when you invest in different funds and share classes. It is expressed as an annualised percentage. The EAC is made up of four components, which are added together, as shown in the table above. The effect of some of the charges may vary, depending on your investment period. The EAC calculation assumes that an investor terminates his or her investment in the share class at the end of the relevant periods shown in the table.

EAC mentioned above is forward looking estimations for 1/3/5/10 years. It is a reasonable best estimate based on the last financial year or last half year actual cost figures (as applicable).

EAC will be updated twice a year.

For a list of EACs for all share classes, please refer to our website www.franklintempleton.co.za.

What are the Risks?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Concentrated fund:** The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses. **Emerging markets investment:** The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries. **Fund currency:** Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it. **Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries. **Investment in company shares:** The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates. **Sustainability:** The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. For recent all-in annual costs, as well as hypothetical performance scenarios that show the effects that different levels of return could have on an investment in the fund, where applicable, see the KID. **Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds. **Debt to Equity:** The debt to assets ratio defines the total amount of debt relative to assets. The ratio is used to determine the financial risk of a business. The higher the ratio, the higher the degree of leverage (assets funded with debt), and consequently, financial risk. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

This material is intended to be of general interest only and does not constitute legal or tax advice, a recommendation, solicitation or offer by Franklin Templeton or its affiliates to buy or sell any shares in FTGF or any of the Franklin Templeton Funds or other financial instruments or to provide any investment advice or service. The information provided in this material is not intended as a complete analysis of every material fact regarding any country, region or market. Individual securities are examples only and are not recommendations to buy or sell an investment. Nothing in this document should be construed as investment advice. Opinions expressed are subject to change without notice and do not consider the needs of investors. We urge any person to seek independent or personal financial, legal, accounting and tax advisors for advice prior to the execution of any transaction pursuant to any information received from this document. We further urge any person to consider the price, suitability, value, risk or other aspects of any financial instrument or share discussed in this document. This information is only for use by professional clients. It is not aimed at retail clients. Not for onward distribution.

The sub-funds of FTGF are notified for marketing in multiple EU Member States under the UCITS Directive. FTGF can terminate such notifications for any share class and/or sub-fund at any time by using the process contained in Article 93a of the UCITS Directive.

Important information for South African investors only: Franklin Templeton International Services S.à r.l. ("FTIS") is a registered manager of FTGF, which is an approved foreign collective investment scheme in terms of section 65 of the Collective Investments Schemes Control Act, 45 of 2002 ("CISCA"). Several of the sub-fund of FTGF are currently approved by the Financial Sector Conduct Authority for distribution in South Africa.

Please note, however, that not all of the sub-funds of FTGF are approved for distribution in South Africa in terms of section 65 of CISCA ("Unapproved Funds") and any information contained herein in relation to Unapproved Funds must be disregarded by South African investors. The FTGF prospectus is not an invitation to South African investors to invest in Unapproved Funds and must not be considered by South African investors to constitute, in any way whatsoever, a solicitation for investment in Unapproved Funds or a promotion of Unapproved Funds to South African investors.

Franklin Templeton Investments SA Proprietary Limited is an authorised financial services provider (registration number 2012/220219/07 and FSP number 44475).

Investments in collective investment schemes in securities and hedge funds ("CIS") are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future performance. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

A schedule of fees and charges and maximum commissions is available on request from FTIS at 8A rue Albert Borschette, L-1246 Luxembourg and the Effective Annual Costs are available at the following link: <https://www.franklintempleton.co.za/investor/products/effective-annual-costs>.

Commission and incentives may be paid and if so, would be included in the overall costs. Where a performance fee is charged, for a full description of how performance fees are calculated and applied, please refer to the MDD.

Investments in foreign securities may expose the fund to risks such as potential constraints on liquidity and repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. For full information on all the risks applicable to this fund, please refer to the FTGF prospectus.

A portfolio of FTGF, or a share class within such portfolios, may be closed to new investors or to all new subscriptions or "switches in" (but not to redemptions, "switches out" or transfers) if, in the opinion of the FTIS, closing is necessary to protect the interests of existing shareholders or is necessary to manage the portfolio more efficiently in according with FTIS's mandate.

Any investment entails risks in buying or selling any financial product, which risks are described in the relevant offering documents. Investors should take cognisance that they may not regain the full amount invested. Neither Franklin Templeton, FTGF, nor any of their affiliates provide any guarantee in respect of either the capital or the return of a portfolio.

Portfolio Management: Franklin Templeton International Services S.à r.l. is the Management Company. Investment Managers have been appointed by the Management Company to provide day-to-day management of the net assets of the Funds. Details of the Investment Manager are available in the Fund prospectus.

Performance: The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. The benchmark returns displayed are shown in the reference currency of the Fund's investment strategy USD, while share class returns are shown in the reference currency of share class EUR. As a result, the returns shown above reflect the effect of the hedging strategy and one can compare the returns of the Fund (net of fees) relative to its benchmark index without the impact of exchange rate movements on index returns.
