The Effective Annual Cost (EAC) is a measure which has been introduced to allow you to compare the charges you incur and their impact on investment returns when you invest in different funds and share classes. It is expressed as an annualised percentage. The EAC is made up of four components, which are added together, as shown in the table above. The effect of some of the charges may vary, depending on your investment period. The EAC calculation assumes that an investor terminates his or her investment in the share class at the end of the relevant periods shown in the table.

EAC mentioned above is forward looking estimations for 1/3/5/10 years. It is a reasonable best estimate based on the last financial year or last half year actual cost figures (as applicable).

EAC will be updated twice a year.

For a list of EACs for all share classes, please refer to our website www.franklintempleton.co.za.

What are the Risks?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Counterparty risk:** the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes. **Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities. **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics.

Reduced liquidity may have a negative impact on the price of the assets.

Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. For recent all-in annual costs, as well as hypothetical performance scenarios that show the effects that different levels of return could have on an investment in the fund, where applicable, see the KID.

Comparator: Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Weighted Average Maturity** is the weighted average maturity at issue of the underlying holdings, on a market value basis, expressed in days. **Weighted Average Life:** The average number of days or years to maturity for the underlying holdings. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Franklin Templeton Investments SA Proprietary Limited is an authorised financial services provider, (FSP number 44475) and a member of the Association for Savings & Investment South Africa (ASISA).

Investments in collective investment schemes in securities and hedge funds ("CIS") are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up and past performance is not necessarily a guide to the future performance. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

FTIF is fund of funds portfolios and accordingly invest in portfolios of other CIS that levy their own charges, which could result in a higher fee structure for the fund of funds. A schedule of fees and charges and maximum commissions is available on request from FTIS at 8A rue Albert Borschette, L-1246 Luxembourg.

Commission and incentives may be paid and if so, would be included in the overall costs. The charges of the most expensive class offered by FTIF for direct investment by members of the public are reflected in the Minimum Disclosure Document ("**MDD**") in respect of each relevant fund, which is available on our website (www.franklintempleton.co.za) or which may be obtained free of charge from FTIS or your local Franklin Templeton Investments ("**FTI**") representative. Where a performance fee is charged, for a full description of how performance fees are calculated and applied, please refer to the MDD.

FTIF is priced on a forward basis and prices are calculated daily.

Investments in foreign securities may expose the fund to risks such as potential constraints on liquidity and repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. For full information on all the risks applicable to this fund, please refer to the FTIF prospectus.

A portfolio of FTIF, or a share class within such portfolios, may be closed to new investors or to all new subscriptions or "switches in" (but not to redemptions, "switches out" or transfers) if, in the opinion of the FTIS, closing is necessary to protect the interests of existing shareholders or is necessary to manage the portfolio more efficiently in accordance with FTIS's mandate.

Additional information including application forms, copies of the latest prospectus, MDD and the latest annual and semi-annual reports of FTIF are available on the website www.franklintempleton.co.za or may be obtained free of charge from FTIS or your local FTI representative.
